

# 2012 Hands-On Summer Science Day Camps

## **NEW! LONGBOAT EXPLORERS (AGES 12-18): JULY 24-25 OR AUG. 20-21, COST: \$140**

Row and sail aboard a 26 foot open boat while discovering the life beneath you through science activities. Work with fellow crew members in this 2-day program to navigate the vessel over eel grass beds and deeper waters. Campers will also have the opportunity to create experiments to learn more about marine life. Perfect for returning or new campers. Check out this fun and exciting new program in collaboration with the NW Maritime Center!

## **JUNIOR EXPLORERS (AGES 5-7): JUNE 25-29 & AUG. 6-10, COST: \$140**

Spend a week exploring and discovering marine and coastal life--animals, plants and secret spots. This half-day camp is all about fun, with activities in and around the Marine Science Center. It's a great program for the younger camper who loves marine animals and exploring on the coast. Choose between a morning or afternoon camp.

## **COASTAL EXPLORERS (AGES 8-12): JULY 9-13, COST: \$225**

Ready, set, explore! Examine the varied natural environments of beach, glacial bluff, forest, pond and meadow. Using observation skills, campers discover how these places support life in the coastal ecosystem. This is the perfect camp for nature-loving kids who want to explore it all!

## **MARINE BIOLOGY CAMP (AGES 9-13): JULY 30-AUG. 3, COST: \$225**

Immerse yourself in Marine Biology! Campers engage in exciting classes, labs and field programs. A few of the many captivating activities include: sieving through goopy sediments looking for brittle stars, pulling a seine net through eelgrass beds to learn where young fish hide and using microscopes to observe the plankton that supports all life in the sea.

*Limited scholarships available*

*Port Townsend Marine Science Center day camp activities located at Fort Worden State Park
